*Triceratops horridus*: deze reusachtige planteneter is een icoon uit het dinotijdperk. En uiterst zeldzaam bovendien, wereldwijd is maar een handvol skeletten te zien. Naturalis vond er maar liefst vijf bij elkaar in Wyoming (VS). Een team experts legde ruim 1200 botten en botfragmenten bloot. Onderzoek wijst uit dat het gaat om een unieke vondst: het is een kudde! Na meer dan tien jaar opgraven, prepareren en onderzoeken, wordt de kudde nu voor het eerst samen tentoongesteld.

250+ pieces**

*Triceratops horridus*: this giant herbivore is an icon of the dinosaur era. It is also extremely rare; only a handful of skeletons can be seen worldwide. Naturalis has found as many as five together in Wyoming, USA. A team of experts uncovered over 1200 bones and bone fragments. Research has shown this to be a unique find: a herd! After more than a decade of excavation and preparation, the herd will now be presented together for the first time.
